

Global
expertise,
local passion.

We are technology

“Our mission is to be the trusted global partner for industrial innovators, who wants to change the world through human enhanced technology.”

Jacob Jimenez, CEO DSA Grupo

How we make the difference?

Customer Partnership

We work closely with our clients, from concept to after sales. We commit with lead time and offer the flexibility requested by today market

Sustainability

We use smart engineering that cut waste, optimize energy and optimized footprint

Human Centric Design

Our solutions are designed to be emphatic and intuitive, to create the most natural interaction between human and technology

The Impact We Deliver

- Increased efficiency
- Reduced errors
- Energy savings
- Enhanced traceability
- Security & Compliance

About DSA GRUPO

Electrical systems & **Software** solutions

Machining and Tooling

Advanced **Automation** and **Testing** Systems

Our History

Delta and Disur companies were created.

Origin

1984

DSA makes a commitment to become a more international company.

International expansion

2008

DYSA was created to provide industrial engineering services.

DYSA Engineering

2016

DSA begins working in the healthcare sector.

Medical Technology

2019

1994
Association
Delta and Disur merge to create "Desarrollo de Sistemas Avanzados" (DSA)

2014
AMSX
AMSX is created for machining services and electrical panel construction.

2017
Asian Market
DSA opens a delegation in the asian marketplace.

2021
DES
Digital Energy Systems was created for services of digitalization and cybersecurity.

Our trusted key customers

50+ global manufacturers across 20 countries rely on us

Sectors server

 Automotive

 Defense

 Household

 Medical Equipment

 Aeronautical

 Electronics

 Textile

Meeting Global Standards

- ENS (ISO 27001)
- Black Level Ciberseguridad España

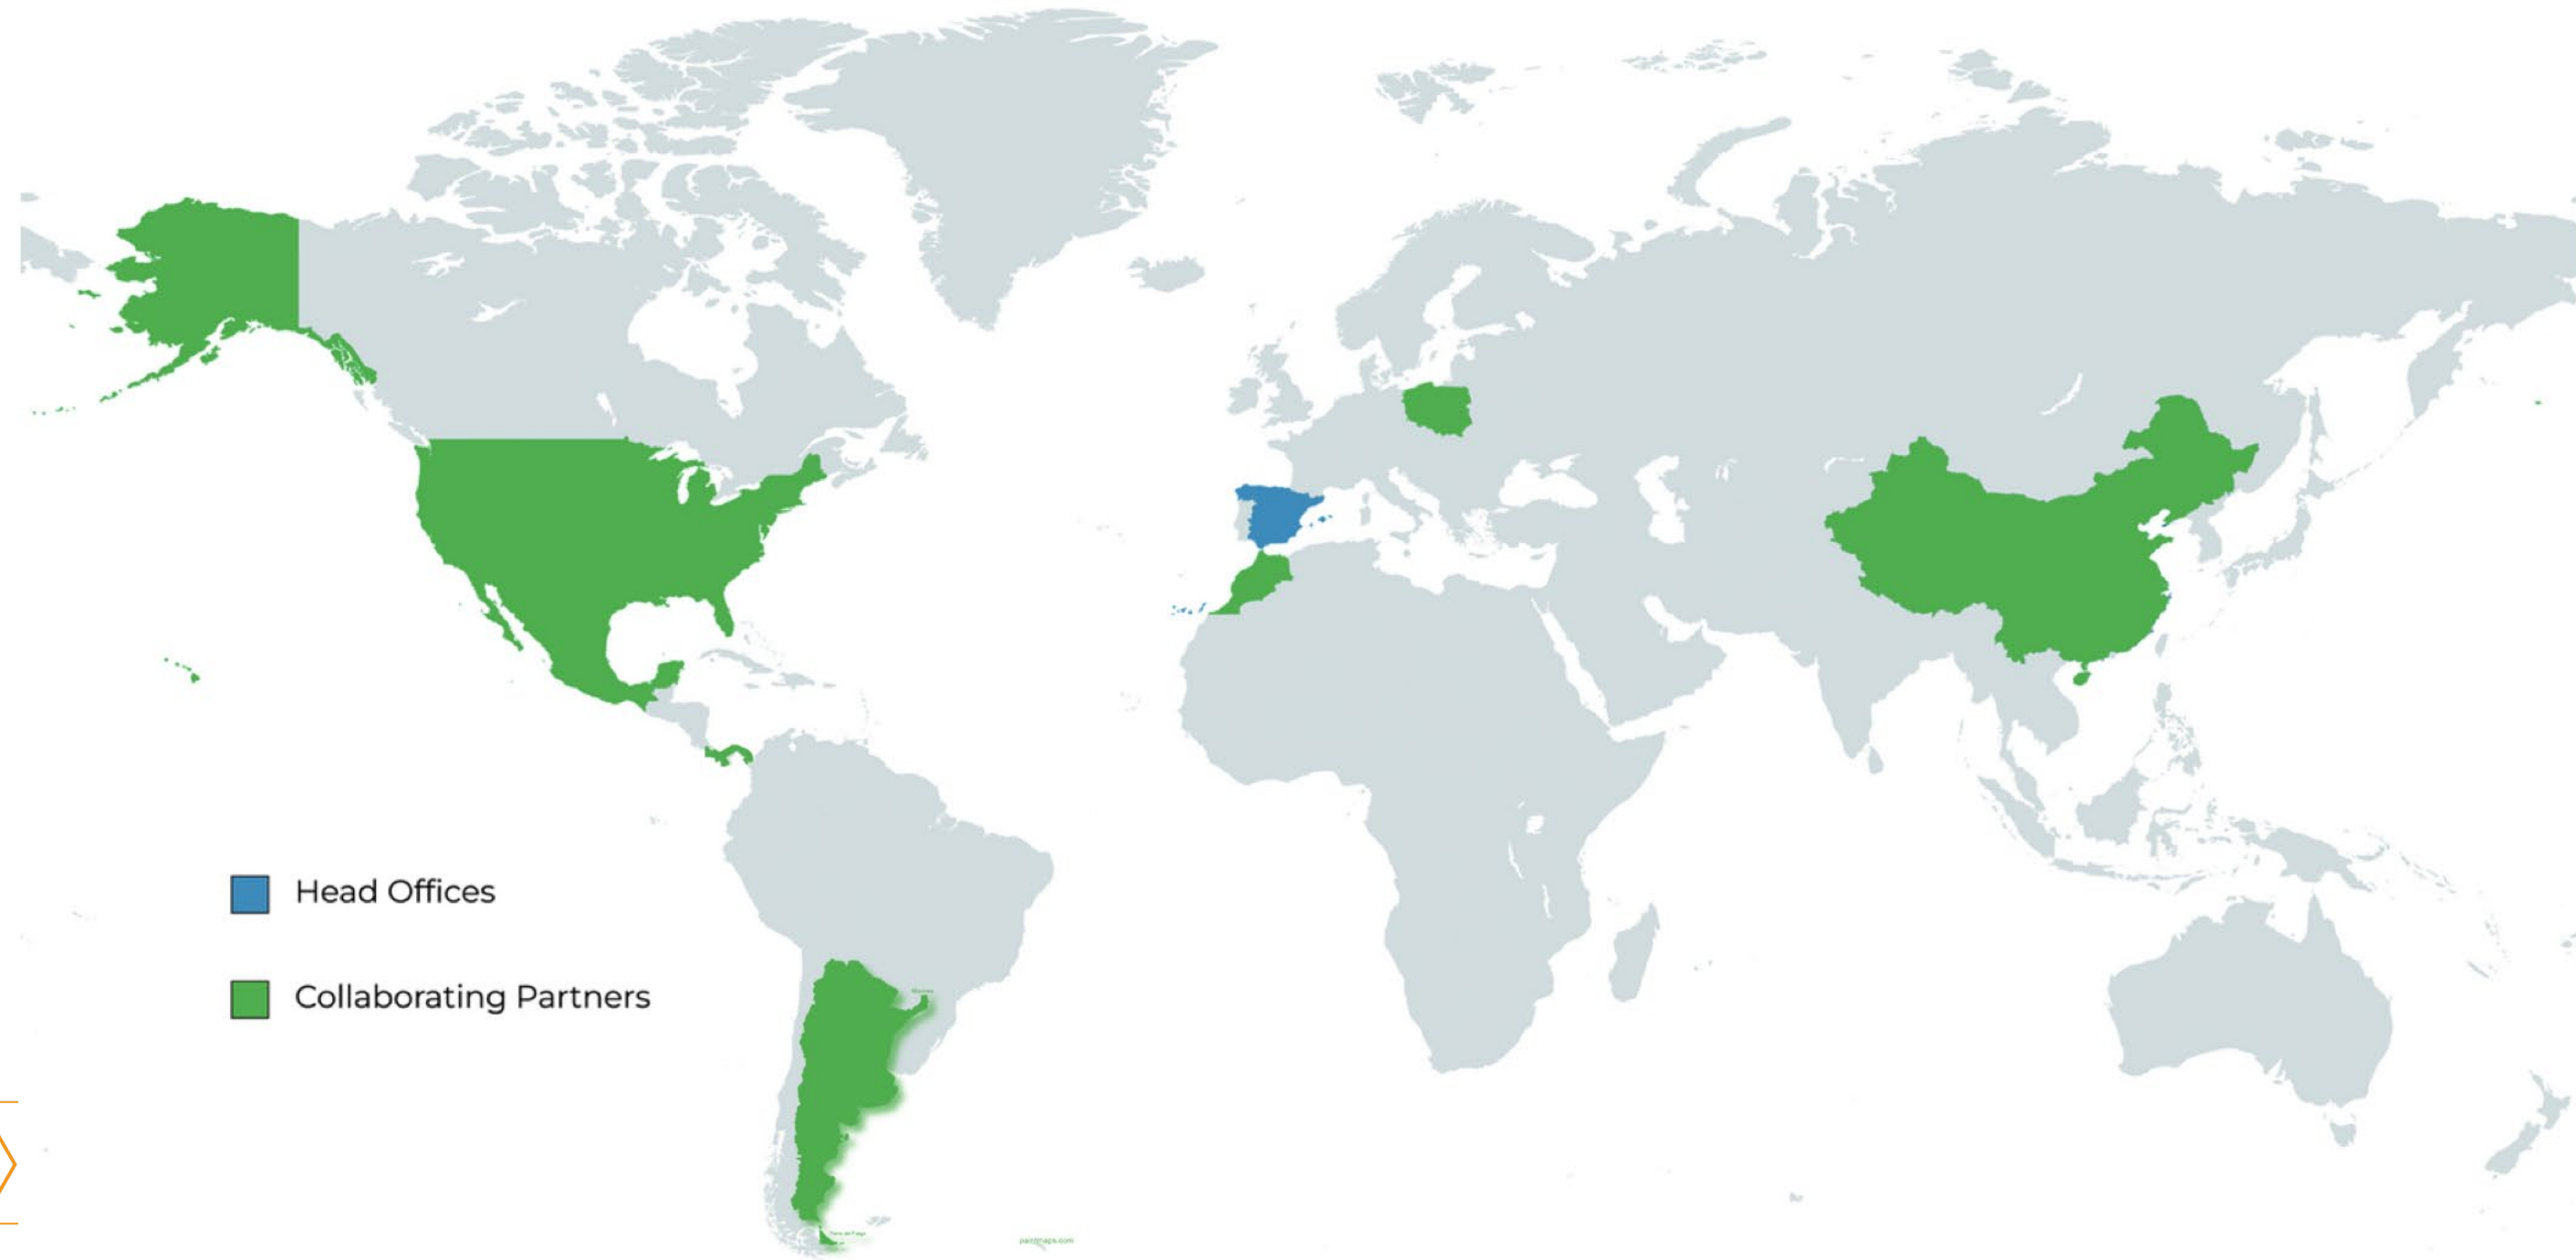

DSA Grupo in

DSA Projects distribution by Location

- **35+ Years of**
- **Experience**
- **140+ Total employees**
- **~ €20 Mln Turnover**

DSA world presence

Circular Economy and Social Impact

Higher Technician in Automation and Robotics
Electrical and Automatic Installations
Higher Technician in Multi-Platform Application Development

Advanced Technician in Multiplatform App Development

Supporting Women in STEM: Internship & Training
Contract with Special Employment Center for People with Disabilities

Participation in the Master's in Renewable Energy – UCA

Capacity and Efficient Machining focused in Defense and Aeronautic

INFORME DIMENSIONAL
P/N: SDAG-01-332A6310-16
Desig: Util soldadura
